

The Noodle® AFO

Advanced Carbon Fiber Brace
for Foot Drop

- Ultra-lightweight, thin and durable
- Patented carbon fiber composite design
- A more flexible strut than standard carbon fiber AFO's to optimize gait dynamics

The Noodle® flexes well beyond the point where standard carbon fiber AFO's break

The Noodle® AFO

Advanced Carbon Fiber Brace

Unique Features of The Noodle® AFO:

- Patented carbon fiber composite design that is more flexible than standard carbon fiber AFO's to optimize mobility
- Fusion - Kinetic Research's patent pending process that provides unique flexibility
- Posterior shell design with energy storing carbon fiber composite dynamic lateral strut and footplate to effectively treat foot drop

The Noodle® AFO is designed to:

- Control foot drop and assist with correct heel strike during gait
- Accommodate plantar flexion tone with variable flexibility foot plate
- Facilitate heel to toe weight transfer with weight bearing
- Provide flex assist at toe-off to increase ankle power at push off
- Provide a swing assist during the swing phase of gait
- Encourage knee flexion with improved ankle / foot biomechanics to improve gait efficiency

Indications for The Noodle® AFO:

- Simple foot drop with functional plantar flexion strength
- Knee hyperextension control
- Mild achilles tightness - equinovarus

Dynamic Performance

The Noodle® carbon fiber composite ankle foot orthosis is a lightweight yet extremely durable AFO. It is ideal for users with varying degrees of foot drop who would benefit from a dynamic energy storing AFO to improve gait. The flexible footplate and flexible strut facilitate a more natural gait than more rigid carbon fiber AFO's.

The Noodle® AFO provides gait assistance by controlling plantar flexion and reducing energy consumption with dynamic dorsi flexion and improved loading response.

A Handcrafted Carbon Fiber AFO Brace

The Noodle® is handcrafted by expert technicians skilled in carbon fiber composite fabrication. This allows for a custom precision fit that optimizes performance and efficacy. The Noodle® is available in either Off-the-shelf, Built-to-spec or Custom-from-cast models.

Off-the-shelf Standard Sizes

Size	Foot Plate	Lateral Shell	Proximal Shell
X-Small	8"	2.5"	13"
Small	9"	2.5"	14"
Medium	10"	3"	15.5"
Large	11"	3.5"	17"
X-Large	12"	3.5"	17"
